

TRAN THI MY NGOC

Intern Frontend Developer (ReactJS)

📞 0382297201

@ tranngoc2k41511@gmail.com

📍 No 470, Tran Dai Nghia Street
Hoa Quy Sub-district, Ngu Hanh Son
District, Da Nang

EDUCATION

Software Engineering
(Korean-Enhanced Program)

**Vietnam – Korea University of
Information and Communication
Technology (VKU)**

2022 - 2027 | Senior at VKU

SKILLS

- HTML, CSS, JavaScript, ReactJS, TypeScript
- React Router, Axios, React Hook Form
- Figma
- Git / GitHub
- Basic understanding of RESTful API
- Teamwork and communication skills

LANGUAGE

English: IELTS 5.0

Korean: TOPIK II (Level 3)

About Me

I have experience in teamwork, Git-based version control, and ReactJS interface development. Although my long-term goal is to become a Korean-speaking Bridge System Engineer (BRSE), I'm eager to expand my technical and practical skills through real project experience. With a proactive and eager-to-learn attitude, I hope to contribute and grow through the Frontend Developer Intern position.

WORK EXPERIENCE

Sep 2024

Internship Training – FPT Software Da Nang

- Participated in professional software development training.
- Worked in team-based simulated projects.
- Practiced ReactJS, Git, and REST API integration.

Sep 2022 - Oct 2025

Personal Projects

- **My portfolio website**

Link: [My Portfolio](#)

I developed a personal portfolio website to showcase my profile, skills, and projects. The website was built using ReactJS and TypeScript, following a clear and maintainable code structure.

- **Korean Language Center Management System**

(Team Project – FPT Software Summer Internship, 2025)

Link: [Center Management System](#)

We designed the UI in Figma and built the frontend with ReactJS, using mock data to simulate RESTful API interactions.

As the team leader, I managed Git, coordinated tasks, and developed the student-side UI for a responsive and consistent interface.
